

Food Allergen Test Kits and Instruments

Food allergens are proteins in food which can trigger allergic, sometimes even life-threatening reactions in sensitized individuals. Very low food allergen concentrations at trace levels are sufficient to cause allergic symptoms. 90% of all food allergies are caused by the following 8 foodstuffs: milk, eggs, peanuts, fish, shellfish, tree nuts, wheat and soy.

The EU directive 2007/68/CE obliges the food manufacturers to label their products with all ingredients potentially capable to cause allergic reactions, whilst EU Regulation 1169/2011 brings together EU rules on general food labelling (including allergens) and nutrition labelling into one piece of legislation.

Many other countries worldwide follow a similar legislation requiring food manufacturers to label allergenic ingredients on food product packaging.

SENSISpec ELISA Kits

Gold Standard Diagnostics offers a full range of food allergen test kits which reliably detect the presence of potential allergens caused by cross-contaminations. The kits provide accurate and fast results and are available for all key allergens.

SENSIStrip Lateral Flow Tests

Lateral flow assays are well suited for quick in-process sampling. With only a few minutes of incubation time, these sensitive tools provide a very easy-to-use technique for adequate control at different stages of the food manufacturing process, across food matrices, rinse water and equipment.

Key Benefits of ELISA Kits

- Quick and sensitive method (low limits of detection)
- Validated protocols for ELISA robots
- Quantitative results, ready-to-use reagents
- High stability, accuracy and reproducibility
- Incubation at room temperature
- Minimum shelf life of 13 months

* All kits are available in 48 wells size

** High sensitivity for hydrolyzed samples; detects Total soy protein (not only the Soy Trypsin Inhibitor)

Allergen Control Materials

The control materials are designed for the validity control of test runs. The material is extracted according to the corresponding IFU and can be directly applied as an additional sample in the ELISA test.

SENSISpec Gluten Detection ELISA Kits

Gluten intolerance is characterized by adverse reactions to gluten, a group of proteins found in wheat, barley and rye. People with celiac disease or gluten sensitivity need to avoid gluten containing foods that trigger symptoms. The European Directive 2007/68/CE assures the adequate labelling of foodstuffs, stating the ingredients that cause allergies and food intolerance, including gluten. This legislation implies a strict control by the food industry and the traceability of the food production process, from raw material to final product; identifying all food ingredients, components and additives, as well as controlling any potential cross-contamination. In order to comply with this objective, the food industry requires adequate tools to monitor their entire process in a quick and reliable manner

We offer a comprehensive range of gluten detection kits using **the R5 monoclonal antibody**.

The SENSISpec INgezim Gluten R5 test method has been evaluated and approved by the AOAC Research Institute Performance Tested MethodsSM Program for use with gluten free bread, oat flour and stainless steel surfaces, and has been assigned PTM Certification No. 052005.

SENSISpec Allergen Spike Solutions

Our SENSISpec Allergen Spiking Solutions can be used to produce positive control samples suitable for validation of all SENSISpec Allergen ELISA kits, such as determination of recovery rate in a spike/recovery assay and matrix interference in a linearity assay. **SENSISpec Spike Solutions are available for all allergen ELISA Kits.**

Automation Solutions

Gold Standard Diagnostics offers a broad menu of innovative, fully-automated, user friendly and compact instruments to simplify laboratory experience. These industry-leading instruments are the standard platforms for our ELISA-based food testing kits.

Fully-automated ELISA processing robots, with validated protocols for:

- Almond
- Casein
- Egg White
- Gluten
- Hazelnut
- Lupin
- Milk
- Mustard
- Peanut
- Soy
- β -Lactoglobulin
