

Exploiting Synergies to Tackle Allergens Management

CLIENT NEEDS / CHALLENGES

- Guaranteeing quality and safety are the key concerns of the company's quality management policy
- Establishing a solid allergen management system requires a thorough validation of the equipment used, tailored to the specific product lines

OUR SOLUTION

- Gold Standard Diagnostics offers a service which helps the customer throughout the entire ELISA test kit implementation and validation for their product testing process.
- Gold Standard Diagnostics provided the following assistance to Loacker:
 - online training to clarify queries,
 - in-house validation of the test kits used with the client's matrices,
 - spiking solution for internal validation of the implemented ELISA analysis method.

RESULTS

- The assistance offered by Gold Standard Diagnostics and spike solutions enables Loacker to continuously validate and improve the ELISA method for allergens management.

Loacker AG/Spa

Leading global brand for premium wafers, wafer based patisserie and chocolate specialties

Sebastian Imperiale,
Analytic Development

„The Gold Standard Diagnostics SENSISpec allergen product team provided us with excellent communication and support, from test kit acquisition to method establishment and matrix validation.“
