

**Validation Sheet  
for  
GENESpin  
Cat. No. 5224400605**

**Setup:** Extraction of DNA from different matrices. Of each matrix three samples are analyzed as follows: one sample sixfold and two samples onefold or – in case of raw materials – twofold.

The following parameters have been validated/verified and the respective performance criteria have been fulfilled:

<b>Method Parameter:</b>	<b>Acceptance Criteria:</b>	<b>Results:</b>
<u><b>DNA Concentration and Yield:</b></u>  Extraction of DNA from different matrices. From each matrix three samples are analyzed as follows: one sample sixfold and two samples onefold or – in case of raw materials – twofold.  <u><b>Processed Products/Feed/Meat:</b></u>  Determination of the concentration of each DNA solution extracted by agarose gel electrophoresis and Pico Green ds DNA Quantification kit. Calculation of the yield.  <u><b>Raw Materials:</b></u> RT-PCR on species single-copy gene, dermination of the species copy number.	Min. 10 ng/ $\mu$ L DNA	-fulfilled-
<u><b>Repeatability Standard Deviation (RSD(r)):</b></u>  Determination of the RSD(r) from the samples extracted sixfold.  <u><b>Processed Products/Feed/Meat:</b></u>  Pico Green Measurement.  <u><b>Raw Materials:</b></u> RT-PCR on species single-copy gene with 5fold dilution of sample DNA.	RSD(r) of the DNA concentration and yield < 25%	-fulfilled- Exemption: Maize flour; however, in repetition RSD <sub>r</sub> under 25% was achieved

<b>Method Parameter:</b>	<b>Acceptance Criteria:</b>	<b>Results:</b>
<p><b><u>Fragmentation state of DNA:</u></b></p> <p>Determination of the fragmentation state by Agarose gel electrophoresis of aliquots of each DNA solution extracted (only for processed products, feed, meat)</p>	<p>Fragment length of the DNA should at least exceed the typical amplicon size of the test systems to be applied (approx. 200 bp).</p>	-fulfilled-
<p><b><u>Purity/Absence of Inhibition:</u></b></p> <p><b>Processed Products/Feed/Meat:</b></p> <p>Determination of absence of inhibition of the DNA aliquots extracted by real-time PCR assay with internal positive control (IPC)</p> <p>High-DNA samples were diluted to a concentrations of 20 ng/<math>\mu</math>l (100 ng/PCR reaction). Samples with a DNA concentration below 20 ng/<math>\mu</math>l were used undiluted.</p> <p><b>Raw Materials:</b></p> <p>RT-PCR on species single-copy gene undiluted and with 5fold dilution of sample DNA.</p>	<p><math>CT_{IPC\ sample} \leq CT_{IPC}</math>  Cut-off <b>and</b> <math>dRn_{IPC\ sample} \geq dRn_{IPC\ Limit}</math></p> <p>Factor Species copy number of DNA undil. vs. diluted 1:5 is between 3,5 and 6,5.  (Data not shown)</p>	-fulfilled- Exemption: chocolate cake sample, which needed additional DNA cleaning (equivalent to GENESpin Clean kit) -fulfilled-

## Sample types

### Processed products

Chocolate cake  
Cereal mix  
Toast bread

### Feed

Poultry feed  
Animal feed protein  
Finished feed

### Meat

Streaky bacon  
Salami saussage  
Beef meat

### Raw Materials

Soy beans  
Corn/Maize kernels  
Corn/Maize flour

## Determination of the DNA concentration an yield

sample no	Replicate	Concentration (ng/µl)	Yield (µg)
CHOCOLATE CAKE	I	8	0.8
CHOCOLATE CAKE	II	13	1.3
CHOCOLATE CAKE	III	10	1.0
CHOCOLATE CAKE	IV	12	1.2
CHOCOLATE CAKE	V	12	1.2
CHOCOLATE CAKE	VI	11	1.1
CEREAL MIX	I	23	2.3
TOAST BREAD	I	24	2.4
POULTRY FEED	I	113	11.3
POULTRY FEED	II	113	11.3
POULTRY FEED	III	112	11.2
POULTRY FEED	IV	115	11.5
POULTRY FEED	V	104	10.4
POULTRY FEED	VI	137	13.7
ANIMAL FEED PROTEIN	I	60	6.0
FINISHED FEED	I	132	13.2
STREAKY BACON	I	60	6.0
STREAKY BACON	II	46	4.6
STREAKY BACON	III	62	6.2
STREAKY BACON	IV	44	4.4
STREAKY BACON	V	64	6.4
STREAKY BACON	VI	58	5.8
SALAMI SAUSSAGE	I	69	6.9
BEEF MEAT	I	290	29.0

Maize kernels: Overall mean copy nos: 68426 c hmgA / 5 µL

Mean sixfold sample: 94705 c hmgA / 5 µL

Maize flour: Overall mean copy nos: 49822 c hmgA / 5 µL

Mean sixfold sample: 57579 c hmgA / 5 µL

Soybeans: Overall mean copy nos: 126374 c lektin / 5 µL

Mean sixfold sample: 173554 c lektin / 5 µL

## Repeatability Standard Deviation (RSD(r)):

### RSD(r) of the DNA concentration and yield

sample	Mean Yield	Standard deviation	Mean Concentration	Standard deviation	Relative standard deviation
CHOCOLATE CAKE	1.1 µg	0.2 µg	11.0 ng/µl	1.8 ng/µl	16.3%
POULTRY FEED	11.6 µg	1.1 µg	115.7 ng/µl	11.1 ng/µl	9.6%
STREAKY BACON	5.6 µg	0.9 µg	55.7 ng/µl	8.5 ng/µl	15.3%

### Raw Materials:

#### **Relative standard deviation of 6 species copy number measurements in 1:5 dilution of DNA:**

Maize kernels: 14%

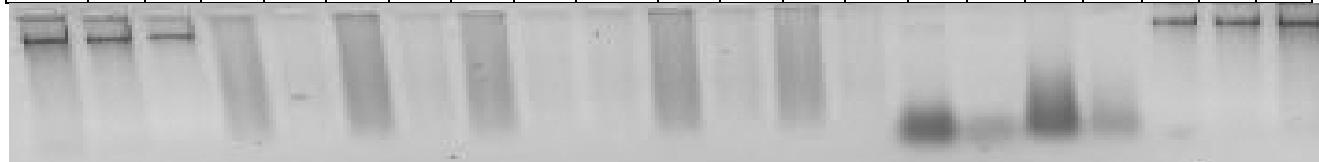

Maize flour: 29% (repetition: 5%)

Soybeans: 5%

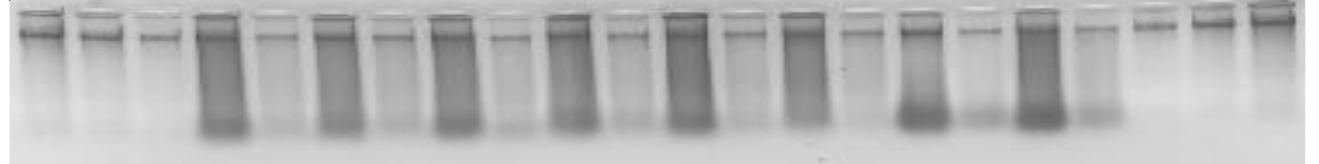

## Amount of DNA
